Subject: Microsoft Settlement

I support the proposed anti-trust settlement negotiated among Microsoft, the federal government, and nine states. Additional litigation would not be in the best interest of consumers or taxpayers.

Microsoft is largely responsible for the thriving technology environment we enjoy today. This environment is the result of the open PC Windows-based architecture which has spawned the development of countless third-party applications operating virtually seamlessly across PC platforms.

Thank you for considering my comments.

Sincerely,

Patrick C. Tullo
